Illuminating how diverse factors shape the relationship between archives, recordkeeping systems, and recordkeepers, the book depicts struggles for different social justice objectives. Discussions and debates about social justice are playing out across many disciplines, fields of practice, societal sectors, and governments and yet one-dimension cross-cutting these actors and engagement spaces has remained unexplored: the role of recordkeeping and archiving. To clarify and elaborate this connection, this volume provides a rigorous account of the engagement of archives and records - and their keepers - in struggles for social justice. Drawing upon multidisciplinary praxis and

scholarship, contributors to the volume examine social justice from historical and contemporary perspectives and promote impact methodologies that align with culturally responsive, democratic, Indigenous and transformative assessment. Underscoring the multiplicity of transformative social justice impacts influenced by record making, recordkeeping, and archiving, the book presents nine case studies from around the world that link the past to the present and offer pathways towards a more just future. Archives, Record-keeping and Social Justice will be essential reading for researchers and students engaged in the study of archives, truth and reconciliation processes, social justice and human rights. It should also be of great interest to archivists, records managers and information professionals. In the Freud Archives Sep 27 2020 Includes an afterword by the author In the Freud Archives tells the story of an unlikely encounter among three men: K. R. Eissler, the venerable doyen of psychoanalysis; Jeffrey Moussaieff Masson, a flamboyant, restless forty-two-year-old Sanskrit scholar turned psychoanalyst turned virulent anti-Freudian; and Peter Swales, a mischievous thirty-five-year-old former assistant to the Rolling Stones and self-taught Freud scholar. At the center of their Oedipal drama are the Sigmund Freud Archives--founded, headed, and jealously guarded by Eissler--whose sealed treasure gleams and beckons to the community of Freud scholarship as if it were the Rhine gold. Janet Malcolm's fascinating book first appeared some twenty years ago, when it was immediately recognized as a rare and remarkable work of nonfiction. A story of infatuation and disappointment, betrayal and revenge, In the Freud Archives is essentially a comedy. But the powerful presence of Freud himself and the harsh bracing air of his ideas about unconscious life hover over the narrative and give it a tragic dimension.

Eerie Archives Oct 29 2020 Cousin Eerie brings the gore! The Eerie Archive of terrifying horror, fantasy, and science fiction overflows with a bounty of black-and-white tales, always delivering bizarre twists and ironic punches! The latest volume in Dark Horse's award-winning hardcover series features early pieces starring Jim Starlin's Darklone the Mystic, gorgeous color covers by Frank Frazetta, the introduction of the time-traveling, gun-slinging Rook, and plenty of standalone scares. Collecting every story, letter column, and text piece from issues #81 through #85, Eerie Archives has something for every horror devotee!

J. Franklin Jameson and the Birth of the National Archives, 1906-1926 Apr 03 2021

This book is a volume in the Penn Press Anniversary Collection. To mark its 125th anniversary in 2015, the University of Pennsylvania Press rereleased more than 1,100 titles from Penn Press's distinguished backlist from 1899-1999 that had fallen out of print. Spanning an entire century, the Anniversary Collection offers peer-reviewed scholarship in a wide range of subject areas.

Creepy Archives Jul 26 2020 This vein-chilling second volume showcases work by some of the best artists to ever work in the comics medium, including Alex Toth, Gray Morrow, Reed Crandall, John Severin, and others. Each archive volume of Creepy is packed with stories (usually up to eight short stories were featured

in every issue!) running the gamut of gruesome subject matter, from reimagined horror classics such as The Cask of Amontillado, to spectacularly mind-twisting shorts such as The Thing in the Pit, or the macabre maritime yarn Drink Deep. * This volume collects Creepy #610. "Since the stock is much finer than the authentic newsprint, visually, these pages are better than the originals, with moodily, dark blacks that punctuate the shock endings." Publishers Weekly

Processing the Past Oct 21 2022 Processing the Past explores the dramatic changes taking place in historical understanding and archival management, and hence the relations between historians and archivists. Written by an archivist and a historian, it shows how these changes have been brought on by new historical thinking, new conceptions of archives, changing notions of historical authority, modifications in archival practices, and new information technologies. The book takes an "archival turn" by situating archives as subjects rather than places of study, and examining the increasingly problematic relationships between historical and archival work. By showing how nineteenth- and early twentieth-century historians and archivists in Europe and North America came to occupy the same conceptual and methodological space, the book sets the background to these changes. In the past, authoritative history was based on authoritative archives and mutual understandings of scientific research. These

connections changed as historians began to ask questions not easily answered by traditional documentation, and archivists began to confront an unmanageable increase in the amount of material they processed and the challenges of new electronic technologies. The authors contend that historians and archivists have divided into two entirely separate professions with distinct conceptual frameworks, training, and purposes, as well as different understandings of the authorities that govern their work. *Processing the Past* moves toward bridging this divide by speaking in one voice to these very different audiences. Blouin and Rosenberg conclude by raising the worrisome question of what future historical archives might be like if historical scholars and archivists no longer understand each other, and indeed, whether their now different notions of what is archival and historical will ever again be joined.

Dark Archives May 16 2022 On bookshelves around the world, surrounded by ordinary books bound in paper and leather, rest other volumes of a distinctly strange and grisly sort: those bound in human skin. Would you know one if you held it in your hand? In *Dark Archives*, Megan Rosenbloom seeks out the historic and scientific truths behind anthropodermic bibliopeggy—the practice of binding books in this most intimate covering. Dozens of such books live on in the world's most famous libraries and museums. *Dark Archives* exhumes their origins and brings to life the doctors, murderers, and indigents whose lives are sewn together in this disquieting collection. Along the way, Rosenbloom tells the story of how her team of scientists, curators, and librarians test rumored anthropodermic books, untangling the myths around their creation and reckoning with the ethics of their custodianship. A librarian and journalist, Rosenbloom is a member of The Order of the Good Death and a cofounder of their Death Salon, a community that encourages conversations, scholarship, and art about mortality and mourning. In *Dark Archives*—captivating and macabre in all the right ways—she has crafted a narrative that is equal parts detective work, academic intrigue, history, and medical curiosity: a book as rare

and thrilling as its subject.

The Atrocity Archives Jul 06 2021 Charles Stross takes a departure from his epic science fiction to craft this cross between Len Deighton—style espionage and H.P. Lovecraftian horror. Bob Howard is a computer-hacker desk jockey, who has more than enough trouble keeping up with the endless paperwork he has to do on a daily basis. He should never be called on to do anything remotely heroic. But somehow, he is...

Public Records and Archives in Classical Athens Sep 08 2021 In this book, James Sickinger explores the use and preservation of public records in the ancient Athenian democracy of the archaic and classical periods. Athenian public records are most familiar from the survival of inscribed stelai, slabs of marble on which were published decrees, treaties, financial accounts, and other state documents. Working largely from evidence supplied by such inscriptions, Sickinger demonstrates that their texts actually represented only a small part of Athenian record keeping. More numerous and more widely used, he says, were archival texts written on wooden tablets or papyri that were made, and often kept for extended periods of time, by Athenian officials. Beginning with the legislation of Drakon in the seventh century B.C., Sickinger traces the growing use of written records by the Athenian state over the

next three centuries, concluding with an examination of the Metroon, the state archive of Athens, during the fourth century.

Challenging assumptions about ancient Athenian literacy, democracy, and society, Sickinger argues that the practical use and preservation of laws, decrees, and other state documents were hallmarks of Athenian public life from the earliest times.

Archives and the Digital Library Feb 25 2023 Technological advances and innovative perspectives constantly evolve the notion of what makes up a digital library. Archives and the Digital Library provides an insightful snapshot of the current state of archiving in the digital realm. Respected experts in library and information science present the latest research results and illuminating case studies to provide a comprehensive glimpse at the theory, technological advances, and unique approaches to digital information management as it now stands. The book focuses on digitally reformatted surrogates of non-digital textual and graphic materials from archival collections, exploring the roles archivists can play in broadening the scope of digitization efforts through creatively developing policies, procedures, and tools to effectively manage digital content. Many of the important advances in digitization of materials have little to do with the efforts of archivists. Archives and the Digital Library concentrates specifically on the developments in the world of archives and the digitization of the unique content of information

resources archivists deal with on a constant basis. This resource reviews the current issues and challenges, effective user assessment techniques, various digital resources projects, collaboration strategies, and helpful best practices. The book is extensively referenced and includes helpful illustrative figures. Topics in Archives and the Digital Library include: a case study of LSTA-grant funded California Local History Digital Resources Project expanding the scope of traditional archival digitations projects beyond the limits of a single institution a case study of the California Cultures Project the top ten themes in usability issues case studies of usability studies, focus groups, interviews, ethnographic studies, and web log analysis developing a reciprocal partnership with a digital library the technical challenges in harvesting and managing Web archives metadata strategies to provide descriptive, technical, and preservation related information about archived Web sites long-term preservation of digital materials building a trusted digital repository collaboration in developing and supporting the technical and organizational infrastructure for sustainability in both academic and state government the Archivists' Toolkit software application Archives and the Digital Library is timely, important reading for archivists, librarians, library administrators, library information educators, archival educators, and students. Managing Local Government Archives Jun 24 2020 Managing Local Government Archives describes and prescribes the essential elements and best practices of a local government archives program. It is intended to be both a text for classroom instruction and a self-help tool for both professional and paraprofessional archivists. It is also intended to be helpful to local governments considering the planning and implementation of a formal archives program.

[Participatory Archives](#) Oct 09 2021 The rise of digitisation and social media over the past decade has fostered the rise of participatory and DIY digital culture. Likewise, the archival community leveraged these new technologies, aiming to engage users and expand access to collections. This book examines the creation and development of participatory archives, its impact on archival theory, and present case studies of its real world application.

Participatory Archives is divided into four sections with each focused on a particular aspect of participatory archives: social tagging and commenting; transcription; crowdfunding; and outreach & activist communities. Each section includes chapters summarizing the

existing literature, a discussion of theoretical challenges and benefits, and a series of case studies. The case studies are written by a range of international practitioners and provide a wide range of examples in practice, whilst the remaining chapters are supplied by leading scholars from Australia, Canada, Denmark, the Netherlands, Norway, the United Kingdom, and the United States. This book will be useful for students on archival studies programs, scholarly researchers in archival studies who could use the book to frame their own research projects, and practitioners who might be most interested in the case studies to see how participatory archives function in practice. The book may also be of interest to other library and information science students, and similar audiences within the broader cultural heritage institution fields of museums, libraries, and galleries.

The National Archives in the Nation's Capital
Jan 24 2023

Immaterial Archives Apr 15 2022 In this innovative study, Jenny Sharpe moves beyond the idea of art and literature as an alternative archive to the historical records of slavery and its aftermath. *Immaterial Archives* explores instead the intangible phenomena of affects, spirits, and dreams that Caribbean artists and writers introduce into existing archives. Through the works of Frantz Zéphirin, Edouard Duval-Carrié, M. NourbeSe Philip, Erna Brodber, and Kamau Brathwaite, *Immaterial Archives* examines silences as black female

spaces, Afro-Creole sacred worlds as diasporic cartographies, and the imaginative conjoining of spirits with industrial technologies as disruptions of enlightened modernity.
